

MOHAMMAD ALMOKDAD

Software Engineer | Frontend & Full-Stack

+962 797 584 652 | almekdad.mohammad@gmail.com | LinkedIn

SUMMARY

Frontend-focused Software Engineer with 5+ years building production web applications, primarily with React and Next.js. Experienced in responsive web design, backend APIs, databases, performance optimization, SEO, and cross-functional product delivery.

SKILLS

Frontend: React, Next.js, Angular, Vue.js, TypeScript, TanStack Query, React Hook Form, Zod, Redux, Zustand, RxJS

Backend & APIs: Node.js, Express.js, Python, FastAPI, Flask, REST APIs, GraphQL

Databases & Testing: PostgreSQL, MongoDB, Jest, React Testing Library, Pytest

Engineering & Web Quality: Git, Vite, Webpack, Agile/Scrum, SEO, Core Web Vitals, Accessibility, i18n/RTL, RBAC, Cursor AI

EXPERIENCE

Frontend Engineer | Jo Academy

Aug 2025 – Present

- Deliver production features and time-sensitive marketing campaigns across Saudi products and international-curriculum learning experiences, collaborating with Product, UI/UX, Backend, and Marketing through release.
- Build reusable frontend foundations for complex workflows, including shared form patterns, RBAC, API/state integration, bilingual RTL/i18n, and performance/SEO improvements.
- Created reusable Cursor Agent Skills and AI-assisted coding workflows to standardize implementation patterns and accelerate team development.

Frontend Engineer | OmniOps

Oct 2024 – Jul 2025

- Contributed to Bunyan, OmniOps' sovereign AI inference platform for text, vision, and speech workloads, delivering responsive production interfaces.
- Owned frontend delivery from Figma through release, collaborating with product, design, and backend teams on API contracts, accessibility, and UX quality.

Software Engineer | Optimum Partners

Dec 2021 – Oct 2024

- Worked directly with international clients, including Hearst, delivering production features for large-scale U.S. media products and collaborating closely with client engineering teams.
- Improved SEO, Core Web Vitals, and frontend performance while building reusable React components across production applications.
- Contributed across the stack with REST APIs, database migrations, and data-layer changes; also delivered an internal CMS and workflow platform for a Saudi government client.

Teaching Assistant | ASAC (LTUC)

Mar 2021 – Dec 2021

- Reviewed daily deliverables, provided actionable technical feedback, and led weekly programming workshops targeting common weak areas.
- Delivered job-readiness and soft-skills sessions while supporting instructors with focused workshops to strengthen student performance.

SELECTED PROJECTS

Wird – Admin Dashboard — Built competition administration workflows spanning registration, filtering, reporting, results, and backend API integration.

Landing Page Builder — Built a CMS + rendering system for reusable sections, configurable content, animations, and scalable landing-page composition.

EDUCATION

B.Sc. Computer Science | Zarqa University

2017 – 2020

TRAINING

Software Development Bootcamp | ASAC

Sep 2020 – Mar 2021
